

Think!

DESIGN THAT INSPIRES.

Well-being that lasts.

As a true pioneer of sustainability in the shoe industry, Think! has been offering sustainable, high-quality shoes with maximum comfort and exceptional design for women and men for more than 30 years. Almost all Think! models feature a modular footbed and are lined with chrome-free leather right up to the toe. Their extra-wide comfort lasts offer sufficient space in the toe area and ensure a natural rolling motion. The cork footbed makes each model particularly breathable and moisture-absorbing and provides optimal cushioning.

Think! models are manufactured in 200 handcrafted steps, the majority in Europe. This ensures short transport routes and the lowest possible carbon footprint. Think!'s own repair service guarantees maximum durability. Think! was the first shoe brand to be awarded the Austrian Ecolabel in 2015. In 2017, the first models followed, which received the Blue Angel. To date, over 50 models have been awarded the prestigious environmental awards.

- **Maximum comfort**
- **Individual design**
- **Natural materials**
- **Pioneer in sustainability**
